ART INITIATION

CURRENT ART USE

ART ADHERENCE

LOGIE CH ET AL. PATHWAYS FROM HIV-RELATED STIGMA TO ANTIRETROVIRAL THERAPY MEASURES IN THE HIV CARE CASCADE FOR WOMEN LIVING WITH HIV IN CANADA. JAIDS JOURNAL OF ACQUIRED IMMUNE DEFICIENCY SYNDROMES. 2018 FEB 1;77(2):144-53.

HIV STIGMA NEGATIVELY AFFECTS ANTI-RETROVIRAL (ART) TREATMENT AMONG CANADIAN WOMEN LIVING WITH HIV THROUGH ITS IMPACT ON PERSONAL RELATIONSHIPS, SELF-IMAGE, AND HOW WOMEN LIVING WITH HIV FEEL THEY ARE PERCEIVED BY OTHERS. THESE FACTORS AFFECT ART INITIATION, USE AND ADHERENCE DIRECTLY, AND ALSO ACT THROUGH THEIR EFFECTS ON DEPRESSION, AND CONCERNS ABOUT HIV DISCLOSURE.
